

Edoardo Vincenzi

Front-end developer

I am an ambitious and determined person. I like challenges. I am always looking for opportunities to do better and grow, but at the same time I want to have fun while I work or study to learn new skills. My goal is to become a better version of myself every day through study and commitment. I am convinced that with commitment and perseverance we can achieve every goals in our life .

Experience

○ Jan. 2022 - Now

Archiva Group | Villafranca di Verona VR, Italy

Front-end Developer

As a frontend developer I have handled features implementation, bugs fixed and creating new web apps. I also worked with the UX / UI team for the creation of the mock graphics implemented by them. As technologies I use **React** as a library for creating web apps using **typescript**. As a CSS Framework I mainly used **Material UI** and **Tailwind CSS**. I used **Storybook** to expose the components created and the realization of snapshot tests and regression tests. I concluded the test part with **Cypress** with the realization of E2E tests. Finally as state managements I mainly used **Redux toolkit** and **Zustand**. I have used other libraries for routing, server calls etc. As a versioning tool I used **Git** and **Bitbucket** as a hosting service for the repositories.

○ Jan. 2021 - Dec. 2021

Enerj S.r.l. | Sant'Ambrogio di Valpolicella VR, Italy

Full stack developer

As a full stack developer I have handled the implementation of the functionalities and the bug fixes of the already present CRM software developed internally. For the frontend implementation I used **Html, css and javascript with JQuery** while for the backend implementation I used **C# with .NET framework 4.8**. To simplify the communication between the two stacks I used **Razor HTML**. I also used **PosgreSQL** as a database, on which I did the work of adding, modifying tables, creating views and creating store procedures. As a versioning tool I used **Git** and **GitHub** as a hosting service for the repositories.

○ June 2017 - Mar. 2019

Archiva Group | Villafranca di Verona VR, Italy

ICT Developer

Design, develop and distribute applications for mission-critical systems.

Software: **Informatica Data Transformation Studio** and **Altova MapForce** for mapping source system data (xml files, flat files, csv, edifact) to data warehouse tables.

Knowledge basic of **SQL Server**, **Oracle**, **DB2**, **MariaDB** for SQL programming.

Language

- English - B1 certificates
- Italian - Native

Skills

- React.js
- Git & GitHub
- Javascript & Typescript
- Html & CSS

Hobbies

- Coding
- Reading fantasy or personal growth books
- Running
- Roleplaying Games like D&D or Pathfinder
